## PANBETON®

### ULTRA-LIGHTWEIGHT CONCRETE CLADDING

Panbeton® is a unique technology of ultra-lightweight concrete cladding. These slabs are quick and easy to install for wall and ceiling covering. It is the ideal covering to dress up a space with concrete.

- > A large lightweight and easy to cut slab.
- > Front made of genuine raw concrete
- > A simple attachment system
- > Quick installation with little handling
- > Endless customisation possibilities.

# TECHNICAL SHEET (INCH)

Technical drawing of a wall panel assembly, showing a perspective view, a side elevation, and a detail view.

**Perspective View (Left):** Shows a wall panel assembly with a total width of 35.43 and a total height of 102.36. The panel is composed of vertical elements of varying heights and widths, creating a textured, layered appearance.

**Side Elevation (Middle):** Shows the side profile of the wall panel assembly. The total height is 102.36. A circular detail marker labeled 'A' is located on the right side. The panel thickness is indicated as 0.78.

**Detail A (Right):** A detailed cross-section view of the wall panel assembly. The total width is 0.78. The panel is composed of a central core (0.39) and two side layers (0.39). The detail shows a vertical section of the panel with a curved top edge and a series of small, rectangular elements (likely fasteners or joints) along the top edge.
